

INTJ

Your life's motto: “Competence + independence = Perfection”

Intellectual, global perspective, long-range planner, ingenious, inventive, so capable, likes figuring things out themselves. Good intuition.

Your life's challenges:

Consider practical realities

Recognize the value of input from others

Balance your work and personal life

You are especially satisfied with work that:

Lets you create and develop innovative solutions to problems to improve existing systems

Lets you focus your energy on the implementation of your ideas and work in a logical and orderly way

Lets you work with other conscientious people whose expertise, intelligence, and competence you respect

Gives you credit for your original ideas and lets you maintain authorship and control over their execution

Allows you to work independently but with periodic interaction with a small group of intellectual people

Exposes you to a steady stream of new information, providing you with new ways to increase your proficiency and competence

Lets you produce a product that meets with your own high standards of quality

Does not require the repetitive execution of factual and detail-oriented tasks

Provides you with autonomy and control and the freedom to effect change and develop people and systems

Involves performance evaluations that are based on established criteria rather than on personality contests, and that compensates you fairly for your contributions

Some careers you may find particularly satisfying; this is not a full list of careers, just some possibilities.

Business/Finance Industry

Telecommunications security

Computer/information services, marketing management consultant

Pharmaceutical researcher

Personal financial adviser

Investment banker

International banker

Credit analyst

Financial analyst

Budget analyst
