

ISTJ

Your life's motto: "Take your time and do it right"

Efficient, keeps things running smoothly. Good manager, practical, has excellent recall, good memory for facts & details, likes structure, likes to serve the community.

Your life's challenges:

Be open to possibilities

Consider implications for people

Embrace change

You are especially satisfied with work that:

Is technical in nature and lets you use your ability to remember facts and details

Involves a real product or service done in a logical and efficient way using standard operating procedures

Lets you be independent with time to work alone and use your powers of concentration

Is done in a stable and traditional environment where you will not be required to take any unnecessary risks or use experimental approaches

Has results that are tangible and measurable

Has explicit objectives and clearly defined organizational structure

Gives you adequate time to prepare before presenting or turning in work

Gives you increasing levels of responsibility with a minimum of social politics

Is done in an environment where practical judgment and experience are valued and rewarded

Allows you to set and reach stated goals by providing you with the necessary resources

Some careers you may find particularly satisfying; this is not a full list of careers, just some possibilities.
